

ABOUT ITACS SOLUTIONS

The name ITACS Solutions stand for Innovative Technology and Cyber Security Solutions. In deciphering the meaning behind the creation of ITACS Solutions, we look at two distinct aspects of the technology sector, Innovation and Cyber Security.

INNOVATION

ITACS Solutions' objective is to stay tuned to technology trends, keep our collective skills honed, and delivering exceptional, innovative technical solutions that meet our customers' requirements. We are continually transforming to keep pace with the dynamics of being a technology-focused service provider in the fast paced and dynamic Information Age that we currently live in.

CYBER SECURITY

In securing data, there is no single solution that encompasses the many facets of cyber security. The security of data must be analyzed holistically, containing all elements of the operational environment. As each environment is unique, mature / process-driven methodologies are critical to exacting an approach that addresses data security requirements.

SERVICES, MISSION, AND VISION

OUR SERVICES

Technology Services

- ✓ Enterprise IT solutions focused on organizational security, efficiency, and modernization activities. Tailored solutions to meet client's needs, leveraging experience and expertise to deliver exceptional results.

Policy and Compliance

- ✓ Industry certified expertise ensuring client's organization activities align with specified security requirements and appropriate governance. We author and review policy and compliance standards for IT operations to ensure conformance to security specifications and requirements.

Consulting Services

- ✓ Industry certified experts to deliver services to organizations. We analyze requirements, baseline objectives and execute life cycle activities while ensuring transparency to provide our customers' value.

Business Operations Services

- ✓ We deliver organizational infrastructure operations services to ensure client's success. We produce financial instruments such as funding elements and task planning activities to allocate funding pools and manage acquisitions, logistics, and asset management activities for organizations.
